Education

Ajay Kumar Garg Engineering College (AKGEC)

Sep 2024 – May 2028

Bachelor of Technology in Computer Science and Engineering — Pre-Final Year (3rd Year) — CGPA: 8.5 (through 2nd year)

Experience

Swayamfin Financial Services

Apr 2026 – Present

Full Stack Engineer Intern — Remote, Delhi

- Building and maintaining a production fintech platform end-to-end — React.js frontend, admin CRM dashboard, and agent portal, with backend built in Spring Boot.
- Designed 20+ REST APIs and automated lead routing logic (city → branch → round-robin agent) with SMS/email notifications, compliant with RBI Fair Practice Code & DPDP Act.
- Collaborating with stakeholders on feature planning, API design, and production deployment workflows.

Freelance Full Stack Developer — Self-Employed

2026

Independent Client Projects

- Designed and delivered a complete business website for AstroMadhupriya, an astrology consultancy — service pages, appointment booking, blog, and contact/lead capture — live at astromadhupriya.com.

Team Conatus — College Technical Society, AKGEC

Nov 2025 – May 2026

Backend Developer — Full-time

- Built and hardened backend APIs with OTP verification, Google reCAPTCHA, and rate limiting; deployed and managed the platform's server on AWS EC2, handling traffic from 1,000+ college students.

Projects

Skrribl.io Arena — Real-Time Multiplayer Game | [GitHub](#) | [Live](#)

2026

React, TypeScript, Node.js, Socket.IO, PostgreSQL, Vercel, Render

- Built a full-stack real-time multiplayer drawing & guessing game from scratch — both frontend and backend — in 72 hours; WebSocket state sync across concurrent players, turn management, live canvas, scoring, and reconnection with full score persistence.

Swayamfin — Fintech CRM Platform | [GitHub](#) | [Live](#)

2026

React.js, Spring Boot, Java, MongoDB, JWT, Tailwind CSS

- Built the complete fintech LSP platform from scratch — React.js frontend and Spring Boot backend — with admin CRM, agent portal, automated lead routing, and 20+ REST APIs; RBI Fair Practice Code & DPDP Act compliant.

AstroMadhupriya — Business Website | [GitHub](#) | [Live](#)

2026

React.js, Node.js, Hosting & Deployment

- Designed and built a complete business website from scratch for an astrology consultancy — service pages, appointment booking, blog, and contact/lead capture — deployed at astromadhupriya.com.

Technical Skills

Languages: C++, Java, JavaScript, TypeScript, SQL

Frontend: React.js, TypeScript, Tailwind CSS, HTML, CSS

Backend: Spring Boot, Node.js, Express.js, MongoDB, PostgreSQL, Socket.IO (WebSockets), REST APIs, JWT Auth

Developer Tools / Infra: Git, GitHub, AWS EC2, PM2, Vercel, Render, Linux

Achievements

- IIT Delhi Hackathon Finalist — Devcation Delhi 2026: Led a 4-member team building GraphGuardians, a GitHub repository vulnerability scanner, to the finals at IIT Delhi among thousands of participants (GDG IIT Delhi & IGDTUW).
- Solved 168 problems on [LeetCode](#); maintains active rated profiles on [Codeforces](#) and [CodeChef](#); contributes to open-source repositories on GitHub.
- CGPA 8.5 / 10.0 at AKGEC (through 2nd Year) · 90.88% in CBSE Class XII — PCM
