Education

Ajay Kumar Garg Engineering College (AKGEC)

Sep 2024 – May 2028

Bachelor of Technology in Computer Science and Engineering — Pre-Final Year (3rd Year) — CGPA: 8.5 (through 2nd year)

Experience

NavRasa IT Solutions

Aug 2026 – Present

Full Stack Engineer Intern — Remote

- Full-stack feature development with React.js and Spring Boot; designing and consuming REST APIs on a live production codebase.

Swayamfin Financial Services

Apr 2026 – Present

Full Stack Engineer Intern — Remote, Delhi

- Built a production fintech platform end-to-end — React.js frontend, admin CRM, agent portal, Spring Boot backend.
- Designed 20+ REST APIs and automated lead routing (city → branch → agent) with SMS/email alerts; RBI & DPDP compliant.

Freelance Full Stack Developer — Self-Employed

2026

Independent Client Projects

- Built and delivered a full business website for AstroMadhupriya — service pages, booking, blog, lead capture — live at astromad-hupriya.com.

Team Conatus — College Technical Society, AKGEC

Nov 2025 – May 2026

Backend Developer — Full-time

- Hardened backend APIs with OTP verification, reCAPTCHA, and rate limiting; ran the platform on AWS EC2 for 1,000+ students.

Projects

Skribbl.io Arena — Real-Time Multiplayer Game | [GitHub](#) | [Live](#)

2026

React, TypeScript, Node.js, Socket.IO, PostgreSQL, Vercel, Render

- Built a full-stack real-time multiplayer drawing & guessing game from scratch — both frontend and backend — in 72 hours, handling WebSocket state sync across concurrent players.
- Implemented turn management, a live shared canvas, real-time scoring, and reconnection logic with full score persistence across sessions.

Swayamfin — Fintech CRM Platform | [GitHub](#) | [Live](#)

2026

React.js, Spring Boot, Java, MongoDB, JWT, Tailwind CSS

- Built the complete fintech LSP platform from scratch — React.js frontend and Spring Boot backend — including an admin CRM and agent portal.
- Implemented automated lead routing and 20+ REST APIs, keeping the platform RBI Fair Practice Code & DPDP Act compliant.

AstroMadhupriya — Business Website | [GitHub](#) | [Live](#)

2026

React.js, Node.js, Hosting & Deployment

- Designed and built a complete business website from scratch for an astrology consultancy, including service pages and a blog.
- Added appointment booking and a contact/lead-capture flow, then deployed and hosted the site at astromad-hupriya.com.

Technical Skills

Languages: C++, Java, JavaScript, TypeScript, Swift, SQL

Frontend: React.js, TypeScript, Tailwind CSS, HTML, CSS

Backend: Spring Boot, Node.js, Express.js, MongoDB, PostgreSQL, Apache Kafka, Socket.IO (WebSockets), REST APIs, JWT Auth

iOS Development: Swift, SwiftUI

Developer Tools / Infra: Git, GitHub, AWS EC2, PM2, Vercel, Render, Linux

Achievements

- IIT Delhi Hackathon Finalist — Devcation Delhi 2026: led a 4-member team building GraphGuardians, a GitHub vulnerability scanner (GDG IIT Delhi & IGDTUW).
- Solved 168 problems on **LeetCode**; active rated profiles on [Codeforces](#) and [CodeChef](#); contributes to open-source.
- CGPA 8.5 / 10.0 at AKGEC (through 2nd Year) · 90.88% in CBSE Class XII — PCM
